PROFESSIONAL SUMMARY

MSc Data Science student with a strong foundation in **Python, SQL, and Machine Learning**. Proficient in building end-to-end ML pipelines covering EDA, feature engineering, model training, and evaluation using Scikit-learn. Experienced in data visualisation with Matplotlib, Seaborn, and Power BI.

TECHNICAL SKILLS

Programming Languages — Python | **Libraries & Frameworks** — TensorFlow, Keras, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn | **Data Analysis & ML Techniques** — EDA, Data Preprocessing, Feature Engineering, Classification, Regression, Hyperparameter Tuning, Feature Scaling, Model Training, Model Evaluation, Cross-validation | **Deep Learning** — ANN, CNN, RNN, LSTM, Neural Networks, Transfer Learning | **Databases** — SQL | **Visualization Tools** — Power BI (Data Visualization) | **Web Technologies** — HTML, CSS, PHP | **Tools** — GitHub, VS Code | **Soft Skills** — Problem Solving, Communication, Time Management, Presentation

PROFESSIONAL EXPERIENCE

Labdox, AI Automation Intern

06/2026 – 08/2026
Pune

- Developed **AI-powered automation workflows** by integrating **Gemini and OpenAI APIs** to build intelligent, automated application features.
- Worked with **Firebase Storage and backend services** for data management and integration within applications.
- Contributed to **full-stack development**, supporting frontend features and backend/API integration for application functionality.
- Performed **software testing and regression testing**, identifying, documenting, and troubleshooting bugs to improve application reliability and user experience.

PROJECTS

Smart FinGuard – AI-Powered Financial Fraud Detection Platform

- Developed an end-to-end fraud detection platform using **Python, Apache Spark, FastAPI, Airflow, AWS S3, XGBoost, LightGBM, and Stacking Ensembles**.
- Processed **5M+ financial transactions** and engineered **27+ fraud-specific features** for predictive modeling.
- Achieved **67.87% Accuracy, 38.17% Recall, and 0.59 ROC-AUC** using ensemble machine learning models on imbalanced fraud data.
- Built automated **ETL, model training, evaluation, and deployment pipelines** with cloud integration.
- Currently enhancing the system using **Deep Learning** for improved fraud detection performance.

NLP-Based Spam Detection System

- Developed an NLP-based Spam Detection System using TF-IDF and Machine Learning techniques to classify emails/messages as Spam or Not Spam.
- Trained and compared Logistic Regression, Naive Bayes, Random Forest, and Linear SVM models, achieving **98.39% accuracy, 96.45% precision, 91.28% recall, and 93.80% F1-score** with Linear SVM, evaluated using Confusion Matrix and Classification Report.

Credit Risk Prediction using Stacking Ensemble (Random Forest, XGBoost & Logistic Regression)

- Developed an end-to-end credit risk prediction model using Python and Scikit-learn, performing EDA, data preprocessing, outlier handling, and proper train-test splitting.
- Built and fine-tuned a stacking ensemble **Random Forest + XGBoost with Logistic Regression as meta-learner** using GridSearchCV and cross-validation, achieving **96.5% accuracy, 95% precision, 89% recall, and 0.92 F1-score** to effectively identify high-risk loan applicants.

Dynamic Retail Pricing & Sales Forecasting System

- Developed an **AI-powered dynamic pricing system** using **Python, TensorFlow/Keras, Scikit-learn, and Streamlit** on **73,100 retail records**.
- Engineered **10+ features** from inventory, demand, discounts, competitor pricing, seasonality, and promotions for price prediction.
- Built a **3-layer ANN model with 3,905 trainable parameters**, achieving **98.78% R², 2.49 MAE, and 2.89 RMSE**.
- Implemented **80:20 train-test splitting, feature scaling, one-hot encoding, and Early Stopping**, with an interactive **Streamlit dashboard** for real-time predictions.

EDUCATION

Symbiosis Skills & Professional University, MSc Data Science

2025 – Present

Indus University, Bachelor of Computer Application

2021 – 2024

- FGPA: 9.25

CERTIFICATIONS

- Python BootCamp — LetsUpgrade
- Power BI Micro Course — Skill Course
- SQL for Data Analysis — Udemy

CO-CURRICULAR ACTIVITIES

Technical Coordinator, ASCIT Club Indus University Led and guided a team of members to organize technical events and workshops, including the university's flagship tech fest Instinct (AGNITIO) , ensuring smooth execution and maximum engagement.	2022 – 2024
Hackathon Participant PCU Gained first-hand experience developing innovative solutions in a team under tight deadlines, enhancing problem-solving, coding, and teamwork skills.	2026
